### DETAILED ACTION

1. This application has been examined. The election filed 8/25/05 has been received. Claims 1-17 are elected.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Emens et al (6463343).

4. Regarding claim 1, Emens et al show a command control device for executing a command that corresponds to a display image selected by a user (abstract, Figure 2A, column 2 lines 1-7), including: an input section provided with an instruction determined by the user (column 1 lines 55-65, column 2 lines 1-15 and 55-64), an output section for outputting a display screen that presents various information to the user (column 2 lines 60-67, column 3 lines 1-11, column 4 lines 15-29), an image

capture section for capturing the display image corresponding to the command from the display screen (column 3 lines 25-45), a command control information generator for generating command control information including regarding the captured image (column 4 lines 20-35 and 47-62), a command control information storage for storing the information (column 4 lines 60-67), a command presenter for making the output section present the image corresponding to the command control information stored so that the user can select the command to be executed (column 6 lines 5-15 and 25-55), and a command selector for executing the command corresponding to the image according to the instruction provided by the input section (column 6 lines 30-45).

5. Regarding claim 2, the image capture section captures the image of an area selected by the user from the screen according to the instruction (column 4 lines 40-50).

6. Regarding claim 3, the image capture section automatically captures all or part of the display screen according to prescribed conditions while an application corresponding to the command is executed (column 4 lines 45-60).

7. Regarding claim 4, the conditions are based either on number of executions of the command (column 6 lines 5-15 and 30-43).

Art Unit: 2174

8. Regarding claim 5, the image is a moving picture varying with time (column 7 lines 10-15, column 5 lines 15-25).

9. Regarding claim 6, the system has a communication section for connecting to the Internet and an image is presented as a bookmark of a browser for presenting information communicated (column 7 lines 20-45).

10. Regarding claim 7, the image is a moving picture varying with time (column 7 lines 10-15, column 5 lines 15-25).

11. Regarding claim 8, image and a text list are used as bookmarks (column 7 lines 40-58).

12. Claims 9-16 show the same features as 1-8 respectively and are rejected for the same reasons.

13. Claim 17 shows the same features as claim 9 and is rejected for the same reasons.

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven P. Sax whose telephone number is (571)
